

IKARUS

Data Exchange with XML-Schema

Willkommen!

IT Working Group

Folie 2

24.06.2000

- **Nik Klever, Bergwacht Bayern**
 - nik.klever@bergwacht-bayern.de
- **Gebhard Barbisch, ÖBRD**
 - gebhard.barbisch@vrz.net
- **Rene Hassler, SAC**
 - griso-data@bluewin.ch

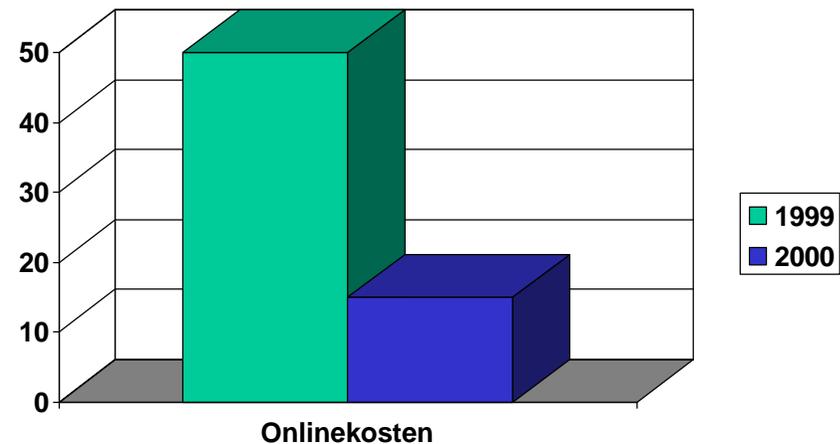

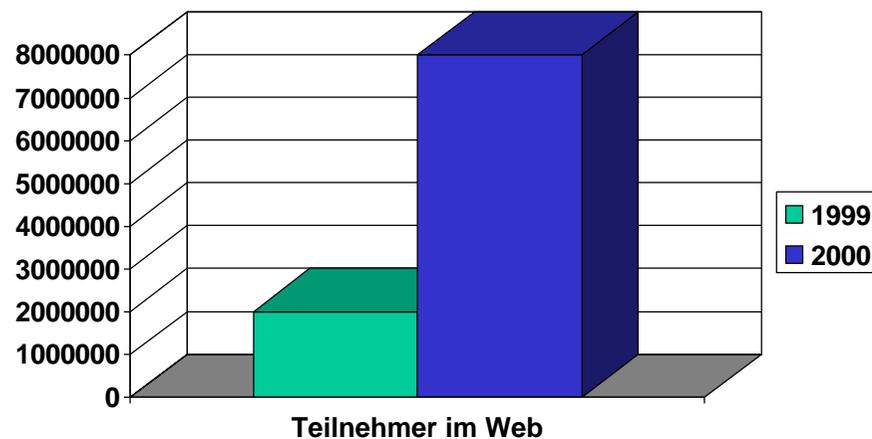

Data Exchange in the IKAR

Folie 3

24.06.2000

- **currently:**
 - 80% with paper
 - 20% with electronic data exchange
- **but:**
 - Internet use grows rapidly through cheaper online costs

Electronic Data Exchange in the IKAR

Folie 4

24.06.2000

- present CSV-Format :
(comma separated variables)
 - no variable fields
 - comma separated fields
- future XML-Schema Format **IKARUS**:
(eXtensible Markup Language – IKAR Unified Schema)
 - Internet format (XML is the succeeding format of HTML)
 - extensible
 - testable to mistakes already during the input procedure

Current Disadvantages / Advantages

Folie 5

24.06.2000

- **Disadvantage:**
 - **3 Files**
 - operational data UNF_01.TXT
 - personal data UNF_02.TXT
 - expenditure data UNF_03.TXT
 - extremely difficult to controll manually

- **Advantage:**
 - existing code

Future Disadvantages / Advantages

Folie 6

24.06.2000

- **Disadvantage:**
 - the file can become rather big

- **Advantage:**
 - 1 file with the same structure:
 - operational data
 - personal data
 - expenditure data
 - manually testable through simple readability
 - Internetformat (XML)
 - extended but optional basic data record
 - in addition extensible and / or restrictable to the needs of the individual organizations
 - multilingual
 - Internet input form is possible for data exchange

Gentle Transition

Folie 7

24.06.2000

- by means of a conversion code which converts the old data into the new data and vice versa, a parallel operation of the old and new format is no problem.

Further Information

Folie 8
