

# Avalanche Accidents in France 2009-2010 Review

# One of the most tragic year since 1980 !

- ✓ 85 avalanche accidents
- ✓ 33 fatal avalanche accidents
- ✓ 41 fatalities

# One of the most tragic year since 1980 !

⇒ the 3rd worst year since 1980-1981  
(in terms of fatal accidents, not fatalities)

# Fatal accidents trend on 30 years

A slight increase in fatal avalanche accidents

# Fatal accidents trend on 30 years

A slight increase in fatal avalanche accidents

# Fatalities trend on 30 years

But, a slight decrease in fatalities over 30 years

# Fatalities trend on 30 years

But, a slight decrease in fatalities over 30 years

# Most accidents in backcountry activities

## 1980-2009 / 2009-10

# Many accidents in unlikely areas

✓ a cold and snowy winter everywhere

✓ many more area concerned than usual (Southern Alps (Corsica), Pyrenees, Massif Central, Vosges)

✓ many accidents in areas that usually are seldom concerned with avalanches

(40% this year VS 20% over 30 years)

⇒ mostly explains this year figures

# Rescuers and means of localization - 2009-2010

# Rescuers and means of localization - 2009-2010

# Buried victims carrying a transceiver 1980-85 / 2005-10

# Rescuers of buried victims carrying transceiver 2005-2010

✓ Backcountry : 43% localized by professional rescuers

✓ Off Piste : 46% localized by professional rescuers

⇒ more people carrying a transceiver, but still not able to rescue their companion !

# Foreigners in French avalanche accidents

# Foreigners in French avalanche accidents

✓ Off Piste : 1/3 caught victims are from a foreign country (10% from United Kingdom)

✓ Alpinism: 2/5 caught victims are from a foreign country (13% from Switzerland)
