Safety Promotion?

Welcome to Land & LIVE

There's a safety tool in every helicopter pilot's toolbox capable of breaking almost every accident chain. But too often, this tool remains tucked away, hidden in the dark recesses of the bottom corner of the toolbox. It's the *Precautionary Landing*. Land & LIVE. Is your flight not going well? Do you have a warning light? Are you or your passengers not feeling well? Is the weather turning? Are you low on fuel? As pilot in command, only you can decide if you should continue the flight. Or take advantage your helicopter's unique ability to land almost anywhere, and make a precautionary landing.

EHEST Helicopter Flight Instructor Guide

Issue 2.2

Publication Date: 27/04/2018

EHEST has developed this comprehensive and fully illustrated Helicopter Flight Instructor guide based on a manual developed by the Australian Civil Aviation Safety Authority (CASA) and other international organisations. CASA kindly made the contents of the publication available to EHEST for dissemination without restriction. In issue 1, EHEST incorporated changes to reflect European terminology and syllabus content and also enriched the manual.

EHEST Leaflet HE 13 Weather Threat For VMC Flights

Publication Date: 01/08/2017

This leaflet aims to reinforce to pilots the need to understand aviation weather, including the appropriate threat assessments and strategies to adopt in relation to pre-flight, in-flight and post-flight operations for a helicopter flight to be conducted under Visual Meteorology Conditions (VMC).
