

# Vital info when seconds matter

User manual | For rescue professionals

# What is twICEme?

twICEme is a digital device that makes vital info easily accessible in emergency situations by using your phone. The twICEme symbol on sports or work equipment indicates an integrated device. The user can upload personal information such as:

Medical info

ICE contacts

Personal identifiers

Exact coordinates

Insurance info

## Get started

Download the free app from [App Store](#), [Google Play](#) or by scanning the QR code. twICEme can be used by all NFC enabled smartphones.

# How to use twICEme

in case of emergency

1

## Find the symbol

Arrival at an emergency scene: while doing patient assessment, look for the twICEme symbol on personal equipment of an injured person.

2

## Place NFC antenna

Place NFC antenna of your phone on the twICEme symbol within **max.1 cm** distance from the equipment. Make sure to know the placement of an NFC antenna on your phone and that NFC is turned on.

3

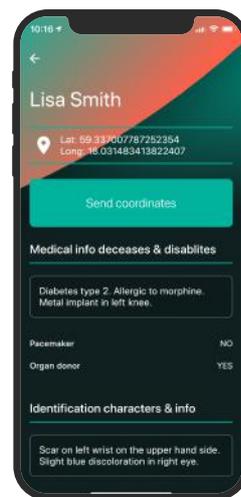

## Scan to access information

In the twICEme app, press 'Tap here to read tag'. Information is also accessible without the app by using the background scan functionality.

4

## Read information

Vital information of the person in question will appear on the screen of your smartphone. The information is presented in order of relevance.

# Equipment with twICEme

twICEme is integrated into equipment like helmets, jackets, backpacks or full body harnesses in the bike, snow and construction industry. twICEme products are now available on market with growing numbers each day.

Here are some examples of equipment with twICEme.
